

RESIDENTIAL PARKING PROGRAM GUIDELINES

QUALIFYING AREAS

In order for a residential parking program to exist, a two prong test must be met per Section 5-89 of the City Code: 1) the area of the street must be 70% occupied and 2) 25% of parked vehicles belong to individuals who do not live in the immediate area. A qualifying area is defined as a portion of any street located between two (2) adjacent intersections. If a landscaped median exists, the qualifying area can be one side of the street.

IMPLEMENTATION DECISION

City Staff will send a "ballot" to each resident via mail, pursuant to City Code, Section 5-89(b)(5). Note: Residents on the corner adjacent to the qualifying street will not be eligible to vote for implementation of the program. Residents will have two weeks to sign and return the ballot. The program may be implemented if 2/3 of the eligible residents respond in favor of the program. An eligible resident is defined as the person of record at such residence according to New Hanover County property tax records. If a ballot is sent to a property owner, their tenant may be their proxy for voting purposes. A signed letter from the property owner giving proxy must be sent to the City of Wilmington, Parking Agent as designated by the City Manager prior to the allowance of such a vote. Final decision on program implementation rests with City Council.
